

Greenhouse effect	Everyday life	Humans and other animals	Transport	Politics	Art and culture
100 The gas people almost always talk about in the climate debate. Answer: CO ₂	100 Apparatus, you put on the roof to create power from the energy of the sun. Answer: Solar cells	100 What every animal does when they breathe in oxygen, eat, and exhale water and CO₂. Answer: Respiration	100 The way of transportation that emits most CO₂? Answer: Flying by airplane	100 Young Swedish girl who has become a symbol of the climate crisis. Answer: Greta Thunberg	100 Michael Jackson's song from 1995, where he mourns the human's destruction of the planet. Answer: Earth Song
200 What you collectively call the gases that effect climate change. Answer: Greenhouse gases	200 The number of kg beef you can get from the same CO₂ emission as 70 kg of potatoes. Answer: 1 kg	200 6-legged animals who travel fast between climate zones as the climate changes. Answer: Insects	200 The 3 types of fossil fuels that are the main cause of the climate crisis. Answer: Coal, oil and natural gas	200 Religious leader who speaks openly about the need to address the climate crisis. Answer: Pope Francis	200 Band, which in 2019 announced that they wouldn't tour until their shows were done in a sustainable way. Answer: Coldplay
300 Gas, which is also found in farts, that effects the climate change worse than CO₂. Answer: Methane	300 The cheapest and most climate friendly way to get new clothing. Answer: Recycling/vintage	300 Animals, who are important for the spreading of pollen, and thus for the production food. Answer: Bees	300 Type of cars, which are currently thought to be replacing the fossil fuel cars. Answer: Electric cars	300 Capital, which in 2015 named the international agreement to bring down the CO₂ levels. Answer: Paris	300 Trees from the book "The Little Prince", which are suspected to die from climate change. Answer: Baobab trees
400 The lowest part of the atmosphere, which is most significant for the climate. Answer: Troposphere	400 Not turning off electrical devices completely, but use a little power to let them be ready. Answer: Standby	400 Animals that carry the most responsibilities for the climate crisis. Answer: Humans	400 Percentage CO₂ saved by riding your bike instead of driving your car. Answer: 100%	400 Former US vice president, who as early as 2009 made a film about the climate crisis. Answer: Al Gore	400 Animation movie, where humans killed all life on the planet and lived on a spaceship. Answer: Wall-E
500 Planet with 96% CO₂ in the atmosphere and a temperature of 462°Celsius. Answer: Venus	500 6 types of garbage which can be reused. Answer: Plastic, metal, glass, paper, greens and batteries.	500 Biological term that describes how many different species you will find in a specific area. Answer: Biodiversity	500 Element from the periodic system, which might make fuel for future sustainable cars. Answer: Hydrogen	500 International organisation, which made the 17 SDGs. Answer: United Nations, UN	500 Artform that the artist, Banksy, uses to communicate political messages. Answer: Graffiti

CO₂-emission from countries	Endangered species	Climate change or just weather	Green things that grow	Organisations	Research
200 Country emitting most CO₂ in 2019. Answer: China	200 Chinese animal, who have been threatened for many years because of loss of forest area. Answer: Giant panda	200 No white Christmas in temperate zones since 2010. Answer: Just the weather	200 Part of tree that absorbs CO₂. Answer: Leaves (and roots).	200 Organisation from 1961, which has a giant panda as a logo. Answer: WWF, Wild Wildlife Foundation	200 Organisation, who collects data on human health worldwide. Answer: WHO
400 Scandinavian country with most trees to absorb CO₂. Answer: Finland	400 Odd, chubby bird, which Spanish sailors made extinct with one single visit to their island. Answer: Dodo	400 Summer 2018 with 55 record days of draft in Europe. Answer: Just the weather	400 When plants use CO₂ and water to make sugar and oxygen with power from the sun. Answer: Photosynthesis	400 Organisation from 1971, which is known for locking themselves to polluting ships. Answer: Greenpeace	400 American space research institute, which keep an eye on the climate change. Answer: NASA
600 Continent with the 10 countries emitting least CO₂ in 2018. Answer: Africa	600 Country with giant forest fires, which currently threatens the koalas. Answer: Australia	600 Increase in the temperature of the planet of 0.9°C in the last 35 years. Answer: Climate change	600 Small organisms in the sea, which absorb large amounts of CO₂ for photosynthesis. Answer: Algae	600 Youth actions where students demonstrate for the climate started by Greta Thunberg in 2018. Answer: FfF	600 Climate change panel founded between World Meteorological Organization and the UN. Answer: IPCC
800 Country emitting most CO₂ per capita in 2017. Answer: Qatar	800 Large, beautiful colonies of small animals in the ocean, which are threatened by climate change. Answer: Corals	800 Increase in the global water level of 3.8mm per year since 1930. Answer: Climate change	800 Genus of the oldest tree in the world, which is rooted in eastern Nevada. Answer: Pine	800 Society who has taken name from the upper limit of CO₂ sustainable in the atmosphere. Answer: 350.org	800 English university, which has had an Institute of Environmental Change since 1991. Answer: Oxford University
1000 Tons of CO₂, per capita American in 2019. Answer: 16.5 tons	1000 Frogs belongs to this group of endangered animals, who are exotherm. Answer: Amphibians	1000 A 0.14 decrease in pH-levels in the upper 1000m layers in the sea since the 1890s . Answer: Climate change	1000 Area, where almost nothing grows because of high temperatures and lack of water. Answer: Desert	1000 Activists, who with use of civil disobedience fight the climate crisis. Answer: Extinction Rebellions	1000 Decade, where the first scientists warned about climate change. Answer: nineteen fifties

Final question

Percentage of mammals on the planet, which are farm animals

Answer: 60%

(36% are humans)

(4% are wild mammals)
